VICARI (for 4 and 6 tubes) INSTALLATION GUIDE

This product must be fitted only by a fully qualified installer.

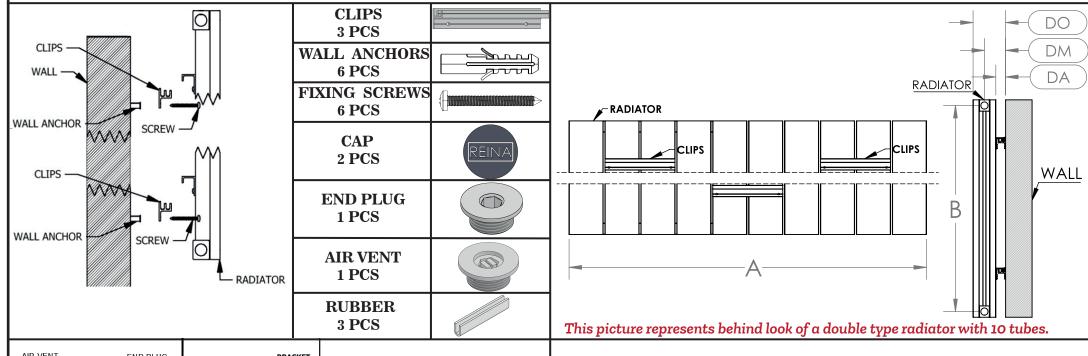

NAMES		Α	В	TUBE QTY	DA	DM	DO
VICARI (SINGLE)	600	400	545	4	22	35	66
VICARI (SINGLE)	600	600	545	6	22	35	66
VICARI (DOUBLE)	600	400	545	4	26	57	88
VICARI (DOUBLE)	600	600	545	6	26	57	88

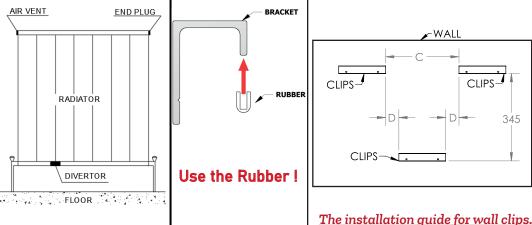

GENERAL RECOMMENDATION

- Before fitting the radiator it is necessary to wash out the heating system to remove any existing mud, scale, work residues, traces of flux, oil, etc.
- When the system water pH is outside the 8,5-5,5 range and/or when the dissolved is above 0,1mg/liter, it is always needed to protect the heating system components (the radiator is one of these) with a proper chemical treatment compatible with all parts in contact with water (silicon rubber too).
- In order to fit the radiator to the wall, it is necessary to choose the proper fixings for the wall material.
- If the system water exceeds °50C, please install a warning mark near the radiator to avoid any accidental scalding.
- Clean the radiator surface only with a soft cloth to avoid scratching the finish and do not use chemical againts during cleaning operations. It is prohibited to climb onthe radiator.
- Maximum working temperature °95C, maximum working pressure 4 bar.

VICARI (for 8,10, 12 and 14 tubes) INSTALLATION GUIDE
